Theme: ICACII 2019

The ICACII 2019: International Conference on Advances in Computational Intelligence and Informatics aims to bring together leading academic scientists, researchers and research scholars to exchange and share their experiences and research results about all aspects of Computational Intelligence and Informatics. The conference will boost excellent innovations in terms of day to day life and academics. The proceedings of the conference will unleash a package platform for innovative ideas into a single unit.

Machine Learning with Python on IBM Cloud:

Cognitive analytics is all about unlocking the hidden insights from your data. Data can be structured, unstructured, audio, or visual – and to make all that data work together as an engine that augments human ability. In this learning path, you will learn how to use state-of-the-art analytic tools from IBM to accelerate your business. Get some practical knowledge with open source Machine Learning libraries and learn how to use the most popular language by data scientists for machine learning: Python.
